PROFESSIONAL SUMMARY

Detailed-oriented QA Tester with manual testing experience of several web applications in domains of blogging, education, and marketing using various test design techniques maintaining test documentation using Jira & Qase. During automation testing of application UI and API following BDD methodology, was working on tests for e-commerce platform using custom framework based on CucumberJS, WebDriver IO and Axios. In addition I am familiar with Agile methodologies SCRUM & Kanban and concepts:
- REST API   - OOP   - JSON
- XML   - HTML   - CSS

Being a fast learner, I am a highly motivated and goal oriented individual that is looking for development of my knowledge and skills in testing and quality assurance.

WORK HISTORY

QuizSpike Ltd - QA Engineer
Kyiv, 05/2022 - Current

Software products:
- Constructor e-stores e-nopcommerce (testing UI and API),
- Quasigalley Blog (testing UI),
- QuizSpike application (testing UI and API),
- Innovation Ukraine website - the Digital accelerator (testing UI)

Responsibilities :
- Adding/editing UI/API tests in custom NodeJS BDD automation framework based on CucumberJS, WebDriverIO and Axios for ecommerce product.
- Creating test documentation (checklists, test cases, test plans, bug reports)
- Adding and editing test cases, test plans, test runs in Qase test-management system,
- Log bug reports in Jira bug-tracking system,
- Creation testing plans (smoke, critical path, regression),
- Performing API testing, using Postman including the creation of autotests suits

TOOLS FOR AUTOMATION TESTING

- NodeJS frameworks: CucumberJS, WebDriverIO , Axios
- Postman
- GitBash
- MS SQL questing for testing purposes testing e-commerece,
- Visual Studio Code (for IDE) as an editor with syntax highlighting for the Gherkin language, which simplifies managment of feature files
- Jenkins pipelines usage for:
  - Test framework versioning on GitHub
  - Running framework tests for e-commerce product

LANGUAGES

Ukrainian, Russian Native languages

English   B1
Polish   A1

SKILLS

Hard Skills:
- Adding/editing UI/API tests in custom NodeJS BDD automation framework based on CucumberJS, WebDriverIO and Axios for ecommerce product
- Test-design techniques usage:
  - Equivalence Partitioning
  - Boundary Value Analysis
  - Ad-hoc Testing etc
- API testing using Postman
- API structure analysis using documentation in Swagger
- Working with Jira, Qase
- Java basics

Soft Skills:
- Good Communication Skills
- Attention to details & Teamwork
- Problem-solving & Adaptability

EDUCATION

Vinnitsa National Technical University

Bachelor degree: System Engineer

COURSES

- 9-month course with personal mentoring on theory and practice of manual testing based on real web applications.
- 6-month course with personal mentoring on theory and practice of automation testing using a custom framework based on CucumberJS, WebDriver IO and Axios, testing the UI and API of the application after BDD.
- Fundamentals of software testing, Lviv IT School - 2022
- SQL Basics Course - Bolt - 2022
- JavaScript with Sololern
